Deloit Industries to Open Another Factory

Deloit Industries, a leading producer of construction equipment, plans to open another factory in 2007. The new factory will be built in Rayong, Thailand, where a number of other large-scale manufacturing companies are located. The company's decision was criticized by many local officials, who claim that Deloit Industries plans to exploit local laborers. In the last decade, many companies have migrated to Thailand because the country's average wages are significantly less than those in North America and Europe. By operating in Thailand, companies are able to decrease their annual expenditures and increase profitability.

Unfortunately, these profits do not always benefit the local communities. According to a company spokesman, however, Deloit Industries will implement a couple of strategies that will benefit the local laborers and their families. Among these "positive plans" are providing health insurance for employees and their families, and giving academic scholarships to employees' children.

The company has implemented similar strategies for employees working at its mines in South Africa, processing plants in the Philippines, and packaging facilities in Brazil. In each place, the company has attempted to hire local workers and integrate itself into the local community. In July, the company hosted a charity event in Buenos Aires, Argentina, to raise money for local schools.

Question 5. According to the article, why has Deloit Industries' decision been criticized?

Question 24 to 28 refer to the following conversation

Jerry Walker has been the head coach for the Chicago Islanders for the last eight years. On August 23, 2007, Mr. Walker will be inducted into the prestigious Basketball Hall of Fame. Mr. Walker agreed to sit down with Sports World to discuss his remarkable career.

Interviewer: So, what does it take to be a professional coach?

Mr. Walker: Actually, a lot of people ask me that, and I always tell them the same thing: work, work, and more work. People are always surprised by my answer.

Interviewer: Most people probably think that your job is pretty easy, am I right?

Mr. Walker: They see me on TV and get the impression that my life is glamorous. The reality of being a professional coach, however, is that you have to be able to multi-task and perform under pressure. I'm like a business manager and athletic trainer, all in one package. I develop training programs for my athletes, investigate other teams' training habits, hire staff, fire staff, schedule practice sessions, consult with injured players, and negotiate contracts with new players.

Interviewer: That does sound like a lot of work for one man. What does your wife think of your career?

Mr. Walker: Well, she wants me to teach in a university like she does rather than work as a coach. She worries about my health and doesn't like the fact that we can't spend much time together. I just love to see athletes excel, and to know that I had something to do with their success. That's what I want the most.

Interviewer: What would you change about your job, if you could?

Mr. Walker: I wish I had more time to coach amateur players, like high school and college athletes. I think it's important to develop the skills of up-and-coming athletes, not just ones who sign a contract with us.

Question 24. Why are many surprised about Jerry Walker's work?

- (A) It is not as easy as it appears to be.
- (B) It pays less than most people expect.
- (C) It doesn't require previous experience
- (D) It benefits disadvantaged athletes

Question 25. What is NOT one of Mr. Walker's responsibilities?

- (A) Hiring new employees (B) Providing a training schedule
(C) Recruiting new players (D) Attending athletic conferences

Question 26. What is Mr. Walker's wife's profession?

- (A) She is an athletic trainer. (B) She is an executive manager.
(C) She is a professor. (D) She is an athletic recruiter.

Question 27. What does Mr. Walker like most about his job?

- (A) He loves the competition.
(B) He likes to help athletes succeed.

Subject: Problems with the network

Dear Mr. Harlow,

I don't know if you've received other complaints already this morning, but at the moment I'm being denied access to the company's network. I've never experienced something like this before. My co-worker, Jim Stevens, said he was having the same problem. When I enter my employee ID and password, I receive this message: Employee ID invalid. I'm positive that I'm entering the correct ID, so I don't know why I can't access the network. I tried to contact the Computer Technician, but he hasn't replied to my emails. I was hoping that you would be able to help me, since you're the Technology Supervisor. I would really appreciate any assistance you can provide at this time.

Thanks!

Subject: Re: Problems with the network

Hi Gail,

I'm sorry that I did not reply sooner, but one of the computers on the fifth floor unexpectedly shut down and I had to investigate the cause. Our Computer Technician, Thomas Benson, has the flu and will not be in the office for the rest of the week. I have heard from many other employees today, and they all mentioned the same error message. I think the problem might be that we updated our computer security system, but I can't be certain until I do a little more research. I'm not sure why, but we seem to be having a lot of problems with our computers lately. This is the tenth complaint I've received this morning. I have scheduled a meeting with the Administrative Supervisor, Philip Downs, at 3 p.m. He should be able to tell me how to fix the problem.

Usually, the kind of error message you describe appears when there is something wrong with the security settings. In the meantime, I recommend that you save all of your current files on a hard disk because there is a possibility that we will have to erase your hard drive. If you have any questions before 5 p.m., you can reach me at ext. # 5498.
